MSC Unified Interpretations to MSC.289(87) and MSC.288(87): Corrosion Protection and Protective Coating for Cargo Oil Tanks of Crude Oil Tankers

The unified interpretations of the resolutions MSC.289(87) and MSC.288(87) were approved by the 93rd MSC session in May 2014.

Enclosed please find **MSC.1/Circ.1478**, which provide the unified interpretation from IMO on the application of the performance standard for alternative means of corrosion protection for cargo oil tanks of crude oil tankers.

Likewise, you will also find **MSC.1/Circ.1479** attached with the approved the unified interpretation on the application of the Performance standard for protective coatings for cargo oil tanks of crude oil tankers.

In line with IMO's request to member states, the Faroese Maritime Authority brings the enclosed interpretations to the attention of all parties concerned.
