MEPC.2/Circ.19
17 December 2013

PROVISIONAL CATEGORIZATION OF LIQUID SUBSTANCES

1 Introduction

This circular is issued in accordance with regulation 6.3 of MARPOL Annex II, replacing all previously issued circulars under this title.

2 Lists of annexes

Annexes 1 to 4 provide lists of noxious liquid substances (NLS) with associated categories and minimum carriage requirements which have been established through Tripartite Agreements and registered with the Secretariat in accordance with the regulation referred to above. Annexes 5 to 8 and 11 are intended to facilitate the reporting of Tripartite Agreements and the interpretation of abbreviations used in annexes 1 to 4.

- annex 1:** List 1: Pure or technically pure products;
- annex 2:** List 2: Pollutant only mixtures containing at least 99% by weight of components already assessed by IMO;
- annex 3:** List 3: (Trade-named) mixtures containing at least 99% by weight of components already assessed by IMO, presenting safety hazards;
- annex 4:** List 4: Pollutant only mixtures containing one or more components, forming more than 1% by weight of the mixture, which have not yet been assessed by IMO;
- annex 5:** List 5: Substances not shipped in pure form but as components in mixtures;
- annex 6:** Synonyms for vegetable oils;
- annex 7:** Country abbreviations;
- annex 8:** Tripartite contact addresses;
- annex 9:** Manufacturers authorized to conduct pollutant-only assessments by calculation;
- annex 10:** Cleaning additives; and
- annex 11:** Biofuels recognized under the *2011 Guidelines for the carriage of blends of petroleum oil and bio-fuels*.

3 Observations related to the annexes

3.1 Language

As seen in the lists, most products are trade-named substances shipped under n.o.s. entries. Since trade names are not translated, the products are entered as notified and the lists are issued in English only.

3.2 Shading

Amendments made to the Product Lists (annexes 1 to 5) relative to the previous circular are identified by shading in the field in which a change has been made.

3.3 List 1: Pure or technically pure products (annex 1)

3.3.1 List 1 entries retained for this circular comprise of the following elements:

- .1 all tripartite entries showing an expiry date (including new notifications received throughout the past year; and
- .2 entries having "all countries/no expiry date" but which were either finalized after adoption of the 2009 amendments to the IBC Code, or were included in the 2009 amendments of the IBC Code but for which changes have subsequently been agreed as reflected in their list 1 profiles.

3.3.2 Included in the latter category, a second batch of new data on electrical equipment (columns i', i'' and i''') for a number of products listed in chapter 17 of the IBC Code (where this information has previously been missing) are also now incorporated into list 1. These products are additional to the first batch of amendments introduced in this context, which were featured in MEPC.2/Circ.17. For these new entries, which were agreed at BLG 16 and MEPC 64, it should be noted that only the information presented for column i has been shaded in order to highlight these products.

3.3.3 For products marked (*), this indicates that with reference to chapter 21 of the IBC Code (paragraph 21.1.3), deviations from the normal assignment criteria used for some carriage requirements have been implemented. Currently, this is applicable only to ammonium chloride solution (less than 25%), cesium formate solution and sodium bromide solution (less than 50%).

3.4 List 2: Pollutant only mixtures containing at least 99% by weight of components already assessed by IMO (annex 2)

For list 2, it should be noted that in addition to the new entries, a small number of other product amendments have been introduced relative to the entries shown in MEPC.2/Circ.17 (based on a reassignment of "contains" names or product withdrawal).

3.5 List 3: (Trade-named) mixtures containing at least 99% by weight of components already assessed by IMO, presenting safety hazards

Similarly, for list 3, it should be noted that there have also been a few deletions relative to the entries noted in MEPC.2/Circ.17 based on a decision not to submit tripartite agreements reaching their expiry date for evaluation.

3.6 Country and Territory Codes (annex 7)

The list of country and territory abbreviations mirrors that used in the Global Integrated Shipping Information System (GISIS), which is based on the UN/Locode, a geographic code scheme, developed and maintained by the United Nations Economic Commission for Europe (UNECE), a United Nations body. These codes are listed in annex 7. Part 1 of the annex presents entries by Code order whilst part 2 gives a listing by Country/Territory order.

3.7 Cleaning additives (annex 10)

3.7.1 MARPOL Annex II regulations for the discharge of Noxious Liquid Substances include restrictions on the types of cleaning additives allowed to be used in tank washing operations as follows:

"13.5.2 When small amounts of cleaning additives (detergent products) are added to water in order to facilitate tank washing, no additives containing pollution category X components shall be used except those components that are readily biodegradable and present in a total concentration of less than 10%. No restrictions additional to those applicable to the tank due to the previous cargo should apply."

3.7.2 All cleaning additives evaluated by the BLG Working Group on the Evaluation of Safety and Pollution Hazards of Chemicals (ESPH) and found to meet the requirements of paragraph 13.5.2 of the MARPOL Annex II are consolidated into annex 10 of the MEPC.2/Circular.

3.7.3 In line with the decision taken by the Marine Environment Protection Committee at its fifty-sixth session, cargo tank cleaning additives which were submitted before 1 January 2007 and were evaluated through MEPC/Circ.363 have now ceased to be valid. Accordingly, all cargo tank cleaning additives presented in annex 10 as meeting the requirements of regulation 13.5.2 of MARPOL Annex II have been evaluated in accordance with the revised guidelines as set out in MEPC.1/Circ.590.

3.7.4 In order to facilitate any future liaison with additive producers that may be required, a record of the Administrations having submitted cleaning additives on behalf of the manufacturers is included for all product entries to annex 10.

3.8 Blends of petroleum oil and biofuels

As agreed at BLG 15, annex 11 has been introduced into the MEPC.2/Circular to record all biofuels approved for biofuel/petroleum oil blends as covered by the *2011 Guidelines for the carriage of blends of petroleum oil and bio-fuels* which are set out in MEPC.1/Circ.761. Further products have now been added to this annex and annex 11 accordingly lists the eight biofuel products which are currently recognized under these Guidelines.

4 Notification of new entries

4.1 *Guidelines for the provisional assessment of liquids transported in bulk* are set out in MEPC.1/Circ.512. When notifying the Secretariat of any provisional assessment made under Tripartite Agreement, Administrations are requested to:

- .1 specify whether in list 1, 2, 3 or 4; and
- .2 provide all relevant data to be included in the circular.

4.2 In addition, to further assist countries in determining the carriage requirements for products in bulk, a summary of "References to Related Information and Recommendations for Ascertaining the Carriage Requirements for Products Shipped in Bulk" has been published on the IMO website and can be accessed at:

<http://www.imo.org/OurWork/Environment/PollutionPrevention/ChemicalPollution/Pages/TripArtiteAgreements.aspx> by following the link under 'Related Documents' document in the right hand column of the page.

4.3 As the majority of products notified are classified by the calculation method and are candidates for list 2, it is particularly important to provide the information to IMO in a format that will facilitate efficient and accurate transfer to the database used to generate the various lists included in this circular.

4.4 For hard copies with **candidates for list 2**, the preferred method is to notify **one product per page in the following format:**

Reporting Country	:
Manufacturer	:
Trade name	:
List Number	:
Contains Name	:
Pollution Category (Cat)	:
Ship Type (ST)	:
n.o.s. Number	:
Melting Point (°C) (Mpt)	:
Flash Point (c.c., °C) (Fpt)	:
Viscosity @ 20°C (mPa.s) (V ₂₀)	:

Note: Incomplete data on a substance will result in the submission being delayed while the application is returned to the originator for further review.

4.5 For products being notified as **candidates for list 1, 3 or 4**, the format shown in appendix 3 of the annex to MEPC.1/Circ.512 is preferred.

4.6 While stressing the importance of correct data being supplied to the Secretariat, it should be noted in particular that, when proposing a product for lists 2 and 4, the component responsible for the greatest pollution potential should be specified following the word "Contains" in the Shipping Name. Such a component is that with the highest value obtained from the calculation of % x component factor. In the event of there being more than one component with equivalent highest scores, discretion may be used in deciding whether one or both components should be identified (see MEPC.1/Circ.512). The name used for the component(s) should be one of those appearing in chapter 17 or 18 of the IBC Code or those in list 1 or 5 of this circular as available.

4.7 It should also be pointed out that any cargo offered for bulk shipment shall be indicated in the shipping document by the product name under which it is listed in chapter 17 or 18 of the IBC Code or the latest edition of the MEPC.2/Circular or under which it has been provisionally assessed. In this respect, special attention should be given to BLG.1/Circ.17 regarding the use of the proper shipping name in offering bulk liquid cargoes for shipment and to BLG.1/Circ.25 which deals with the use of specific product names in preference to generic entries when both options are available to describe a bulk liquid cargo.

4.8 When shipping a pollution hazard only mixture (list 2 or list 4 substances), the appropriate n.o.s. entry in the IBC Code, together with the trade name and "product contains" information, would form the proper shipping name. For example, if the trade name is IMO 1234 and it contains "Calcium long-chain alkyl salicylate (C13+)" as the component with the greatest pollution potential, then the correct product name could be:

Noxious liquid, N.F., (5) n.o.s. (IMO 1234 contains Calcium long-chain alkyl salicylate (C13+)) ST 2, Cat Y

4.9 The Master of a type 2 ship certified to carry n.o.s. (5) products would then know that he can accept the cargo without concern as to fire, toxicity and other safety hazards and that, in the event of an accidental spill, he could report the name of the substance responsible for the pollution to the coastal State authorities.

4.10 When shipping (Trade-named) mixtures, i.e. trade-named mixtures containing at least 99% by weight of components already assessed by IMO, presenting safety hazards (list 3 substances); or pollutant only mixtures containing one or more components, forming more than 1% by weight of the mixture, which have not yet been assessed by IMO (list 4 substances); the trade name and "product contains" information would form the proper shipping name. For example, if the trade name is XYZ 4567 and it contains "hydrochloric acid" as the component with the greatest pollution or safety potential, then the correct product name should be:

XYZ 4567 (contains hydrochloric acid); or

XYZ 4567 contains hydrochloric acid;

5 Tripartite contact addresses

5.1 In accordance with the MEPC resolution on Tripartite Agreements, resolution MEPC.109(49), Administrations are requested to note that contact points which have not informed the Organization of their **latest** contact details should be deemed to have accepted the Tripartite Agreements whilst other contact points should still follow regulation 6.3 of MARPOL Annex II.

5.2 It would, therefore, be appreciated if Administrations could verify that information included in annex 8 of this circular is correct and supply any useful additional information, for example, email addresses, as appropriate. As the Secretariat has only been supplied with the addresses listed, those Administrations which have not supplied any focal point address are requested to do so. **In this respect, it should be noted that the tripartite agreement contact points are now available through the GISIS database and that any amendments required may be effected directly by the Administration concerned.**

LIST 5: SUBSTANCES NOT SHIPPED IN PURE FORM BUT AS COMPONENTS IN MIXTURES

Product Name	Relevant columns of the GESAMP Hazard Profile						Ship Type
	A1	A2	B1	B2*	D3	E2	
Acrylic acid / dimethyldiallylammonium chloride copolymer, partial sodium salt (MWt 1500-4000, aqueous solution)	0	R	0	0		D	NA
L-Aspartic acid, homopolymer, sodium salt (aqueous solution)	0	NR	0	NI		D	NA
3,5-bis(1,1-dimethylethyl)-4-hydroxybenzenepropanoic acid, (C7-C9)-branched alkyl esters	3	NR	3	0		Fp	2
Dipropylene glycol dibenzoate	3	R	3	NI		S	2
Maleic acid/allyl sulfonic acid copolymer with phosphonate groups, partial sodium salt (aqueous solution)	0	NR	0	NI		D	NA
Polyether, borated	0	NR	3	1		D	2
Sodium methylate	(0)	(R)	(2)	NI	T	DE	2
Tall oil acids/linoleic acid dimer/polyalkylenepolyamines/dodecylbenzenesulphonic acid complexes in naphtha/isopropanol	0	NR	1	NI	CM	Fp	2

* BLG 6 had agreed that, in the absence of measured chronic toxicity data, surrogate data using the GHS system to estimate missing chronic aquatic toxicity data could be used and that the estimation of chronic toxicity would be determined as shown below:

1. if, in the GESAMP Hazard Profile, Col B2 is 'NI' or Col A1 is 'NI' or Col A2 is 'NI', then there are not enough data to apply the OECD criteria, and therefore the product is deemed to be chronically toxic to aquatic organisms; but
2. if the aquatic LC50 is <100mg/l (Col B1 is 2, 3, 4, 5 or 6); and the product is Not Readily Biodegradable (Col A2 is 'NR') or the product is bio-accumulated (Col A1 is 4, 5 or 6), then the product is deemed to have a chronic toxicity of <1mg/l which is equivalent to a '1' in column B2; otherwise
3. the product is deemed not to be chronically toxic.

ANNEX 11

Biofuels recognized under the 2011 *Guidelines for the carriage of blends of petroleum oil and bio-fuels*:

Fatty Acid Methyl Esters (FAME)*

Vegetable oils

Ethyl alcohol

Alkanes (C10-C26), linear and branched with a flashpoint >60°C

Alkanes (C10-C26), linear and branched with a flashpoint ≤60°C

Tert-Amyl ethyl ether†

Renewable Aviation Fuel†

Renewable Naphtha†

* This entry is intended to include any specific FAMEs set out in chapter 17 of the IBC Code or the MEPC.2/Circular

† With regard to the shipment of blends of petroleum oil and any of these products under MARPOL Annex II controls, it is necessary to raise or refer to tripartite agreements for such blends indicating the carriage requirements as appropriate.
